#### "INTERMEDIARIES"

For approximately one year, the Board has been discussing the issue of "intermediaries" who come within the chain of command between the person licensed to prescribe medications and treatments and the nurse carrying out the order. Nursing recognizes the expanded technology and knowledge in other allied health professions, i.e., pharmacists, respiratory therapists, etc. There appears to be no conflict when persons licensed to prescribe give orders to these other professions which are then carried out by those professions. The problem for nurses arises when the professionals leave the health care delivery setting and then expect nurses to follow orders which have come to the other profession.

To clarify the interpretation of Chapter 335.016 (8)(c), the Board is filing the following proposed rule for publication in the April edition of the Missouri Register. This rule will be published on April 1, 1983, and a 30-day comment period will follow. The State Board of Nursing will review the submitted comments and finalize the rule to be effective June, 1983. Written comments in favor of, for modification of, or for disposing of the rule are being requested. Please submit comments to: Missouri State Board of Nursing, P.O. Box 656, Jefferson City, MO 65102-0656.

#### 4 CSR 200-5.010 Definitions

(1)(B) The word "prescribed" as it is used in Section 335.016(8)(c), RSMo means that there may not be any individual, who is not a nurse licensed in this state, or who is not licensed in this State to prescribe the particular medication or treatment to be administered, in the chain of communication between the individual who prescribes the medication or treatment and the professional nurse who administers the medication or treatment.

#### RULE CHANGE

Effective January 13, 1983, wording in 4 CSR 200-4.010 Fees and 4 CSR 200-4.020 Requirements for Licensure was amended, deleting reference to "bank draft or U.S. Postal Money Order" and substituting the words "required fee". This will allow the Board to accept personal checks, in addition to cash, money orders or bank drafts.

NEWS ITEM: At the January, 1983 board meeting, approximately 70 nurse practitioners and interested nurses met with the Board to discuss the issue of the *Sermchief v. Gonzales* case. The Board directed its legal counsel, Assistant Attorney General Sara Rittman, to file an amicus curiae brief in this case to provide the Court of Appeals with further information.

NEWS ITEM: As was reported in the November 1982 Newsletter, the Missouri State Board of Nursing has been permitted to intervene as a defendant-intervenor in the case which the Missouri Hospital Association has filed against the Department of Social Services, regarding the question of whether licensed practical nurses may administer intravenous fluids. Instead of a trial on December 16, 1982, a pre-hearing conference was held. At that conference, over defendant's and defendant-intervenor's objections, the Court ruled to limit the number of expert witnesses who may testify in the trial to zero. Brief suggestions, memoranda and amicus curiae will be introduced through the month of February. The parties have agreed that the administration of intravenous fluids constitutes the administration of medications and treatments.

# AVAILABILITY OF VIDEO-TAPE REGARDING NCLEX

To assist nursing students prepare for the National Council Licensure Examination for Registered Nurses, the National Council has produced a 30-40 minute color video presentation that will answer questions and help calm the fears of students preparing to take the licensure examination.

The video tape features Dr. Eileen McQuaid Dvorak answering the questions of senior nursing students preparing to take NCLEX-RN themselves. Their questions reflect the typical concerns and problems that nursing students have been asking Dr. Dvorak to address in her numerous presentations on NCLEX throughout the country.

Detailed visual instructions on how to fill out the application form for NCLEX-RN is included as part of the video presentation.

The video tape is available for purchase from: Chicago Review Press, 213 West Institute Place, Chicago, Illinois 60610

The cost of the program is \$25.00 per candidate. An information brochure and order form may be obtained by contacting the Board Office.

-----FROM THE EXECUTIVE-----

Much discussion nationwide and statewide is currently centering around the "impaired nurse". The impaired nurse is defined by Chapter 335.066, 2(1), "Use or unlawful possession of any controlled substance, as defined in 195 RSMo, or alcoholic beverage to an extent that such use impairs a person's ability to perform the work of any profession licensed or regulated by this chapter". The majority of disciplinary cases that the Missouri State Board of Nursing deals with, are because this section of the statute has been violated.

Voluntary programs to provide assistance to impaired professionals are becoming more prevalent than in the past. There has been an increased recognition on the part of employers and nurses themselves, that such programs are essential. The Missouri State Board of Nursing feels these programs are necessary to assist the individual nurse to become cognizant of, and to cope with the problem. Support systems are a necessary ingredient for these nurses to return to the work setting as safe and effective practitioners.

The Board has been asked if there is a mechanism available by which the Board could refer nurses to rehabilitation programs as soon as a substance abuse problem is reported to our office. The Board of Nursing can take no disciplinary action, nor make such request of nurses, until a long procedure is followed, and it has been proven that the nurse is impaired by the abuse problem. The time and place to recommend the nurse seek this type of assistance is upon the discovery of the problem. Simultaneously, a report should be forwarded to our office to begin the disciplinary procedure. The disciplinary procedure can take as long as a year for completion and if, during that time, the nurse has sought counseling and assistance, this will be considered by the Board in making their final determination of discipline.

Several state boards of nursing are currently working in conjunction with state nurses' associations and/or leagues of nursing to develop such programs. Our office is currently obtaining data from other states to determine how effective these programs are, and which facets come under the voluntary programs' or state board of nursing's auspices.

A state board of nursing is a regulatory body created for the purpose of protecting the public health, safety and welfare. With this mandate from government, the Board accepts its responsibilities and takes very seriously, the disciplinary orders which it must issue. In deciding upon discipline to be imposed, the Board will generally impose the stiffest discipline they feel appropriate, then stay the imposition of the discipline and place the person on a period of suspension and/or probation. With this type of ruling, the Board will then meet periodically with the nurse and request letters from counselors and/or employers for a stated period of time. If, during the period of probation, the person is found to be in violation of the Nursing Practice Act, the initial order may be imposed without repetition of the entire proceeding.

In summary, the Missouri State Board of Nursing is very much in support of programs to assist the impaired nurse. Because of statutory limitations, intervention by the Board early in the disciplinary process is prohibited. In order for the impaired nurse to receive counseling and rehabilitative services as quickly as possible, referral into a program should be done by the complainant at the time a complaint is filed with the Board of Nursing.

# CLASSIFICATION OF ACCREDITATION STATUS

Initial Accreditation: Accreditation granted a program of nursing for that period of time until one (1) class has graduated and the scores achieved by the graduates on the state board licensing examination have been reviewed.

Accreditation: Accreditation granted a program of nursing when the program has met the minimum requirements for accreditation prescribed by the Missouri State Board of Nursing and has demonstrated that the program has been established on a sound educational basis after the graduation of one (1) class.

Conditional Accreditation: If the Board determines at any time a program does not meet the requirements for accreditation, the program shall be consulted, a letter detailing the reasons will be sent to the program. The program will be placed upon conditional accreditation status upon the mailing of the letter.

1. Programs shall receive a letter of warning when state board examination failures of first time candidates exceed twenty percent (20%) and mean scores fall below one (1) standard deviation above the passing score. Two (2) consecutive letters of warning shall result in the program being placed on conditional accreditation status.
2. Programs wishing to have a hearing regarding accreditation status before the Missouri State Board of Nursing shall notify the Board at least three (3) weeks in advance of a regularly scheduled board meeting. All hearings before the Board shall be conducted in accordance with sections 536.070 to 536.080, RSMo.
3. Revocation of Accreditation. Accreditation may be revoked only after notice and hearing in accordance with Chapter 161, RSMo.
